## 校長的話

Tung Wah College (TWC) is a self-financing degree-granting tertiary institution established by the Tung Wah Group of Hospitals (TWGHs) in 2010. With the staunch support of TWGHs as well as TWC's Board of Governors, College Council, staff, students, alumni, benefactors, partners and friends etc., the College has been developing rapidly in the past years and now plays an important role in the self-financing tertiary education of Hong Kong.

Particularly, TWC has built up a niche in healthcare education and made several remarkable achievements to respond to the ageing population and the community needs, e.g.

- Training the greatest annual number of nursing graduates in Hong Kong
- Being the first and only self-financing institution offering professionally accredited degrees to train allied health professionals (namely Medical Laboratory Technologists, Occupational Therapists and Radiation Therapists) in Hong Kong

Besides, TWC is also the first self-financing institution registered under the Post Secondary Colleges Ordinance (Cap 320) offering early childhood education degree and sub-degree programmes to train qualified kindergarten teachers and child care professionals.

While the College takes pride in its development, we must be thankful to our stakeholders for their valuable supports and generous donations throughout the years.

Looking ahead, TWC will continue to excel towards its goal of becoming a leading private university and achieve its mission to offer quality tertiary education for the long term benefits of the community. We would count on your continued support in the years to come.

- Graduate of Bachelor of Science (Hons) in Occupational Therapy (2017)

My voluntary work experience in hospitals inspired me to choose TWC's occupational therapy programme in the hope of helping patients through appropriate treatments and care. At TWC, I was given not only the opportunity to have clinical placements at hospitals and NGOs, but also the chance to join an overseas study tour in Australia to understand the daily works of professional occupational therapists.

Shortly after graduation, I was offered a job in an elderly home. I hope I will help upgrade the quality of the elderly's life by providing quality occupational therapy services to the elderly.
